How to make a wallpaper with the AI wallpaper generator

Three steps to go from a blank screen to a finished wallpaper with the AI wallpaper generator.

1

Describe your wallpaper

Write the scene, style, and colors — for example, a minimalist mountain range at dusk in teal and coral, with calm negative space for your icons.

2

Pick a model and generate

Choose GPT Image 2 or Nano Banana 2 in the AI wallpaper generator, then generate. Each generation spends credits, so you're signed in and in control of the run.

3

Refine by re-prompting

Close but not quite? Tweak the palette or mood in your prompt and generate again until the wallpaper fits your screen and your theme.
